

Ambulatory Emergency Care

An update on measurement

Mike Holmes AEC Network Measurement Team

An update on measurement

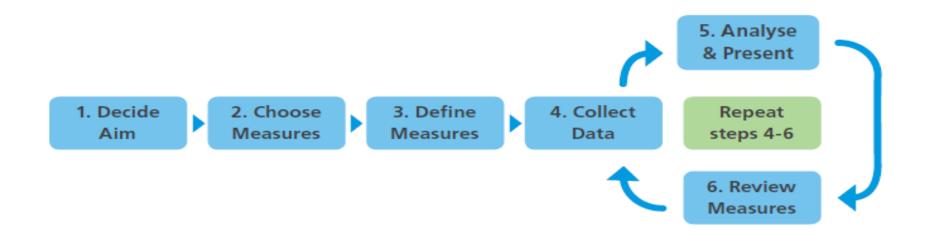

- A reminder of what we covered last time and an update on the Measurement Workshop
- A look at one of your Driver Diagrams
- Some time for you to reflect as a team

Measurement for improvement

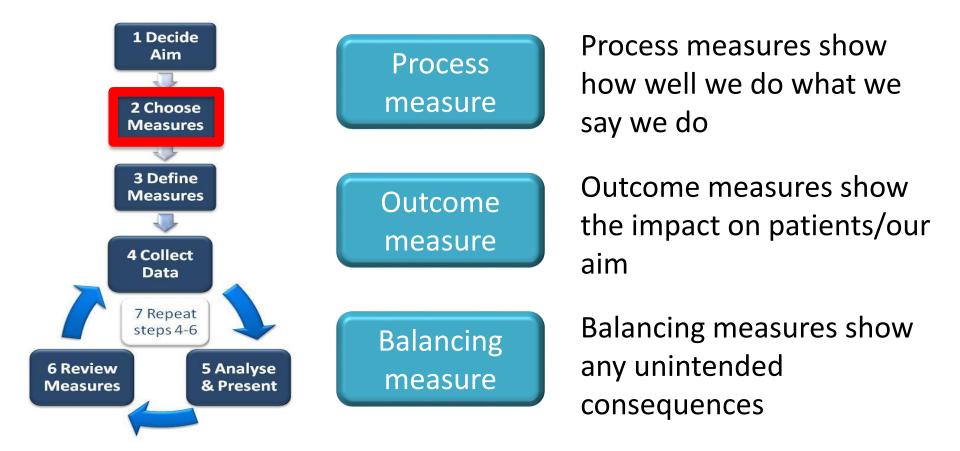

Reference: Langley et al 1996

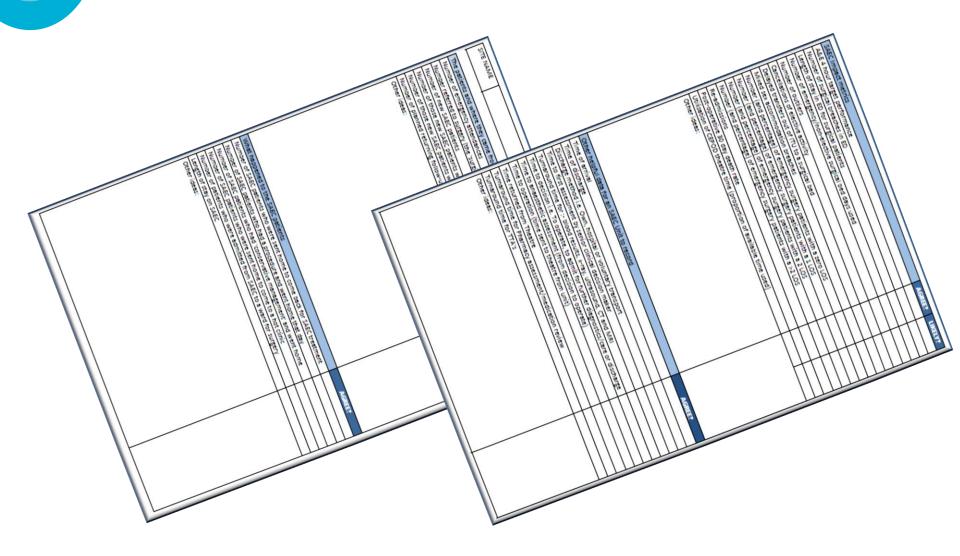

Three types of measures

Here's one we prepared earlier

SAEC Data Template

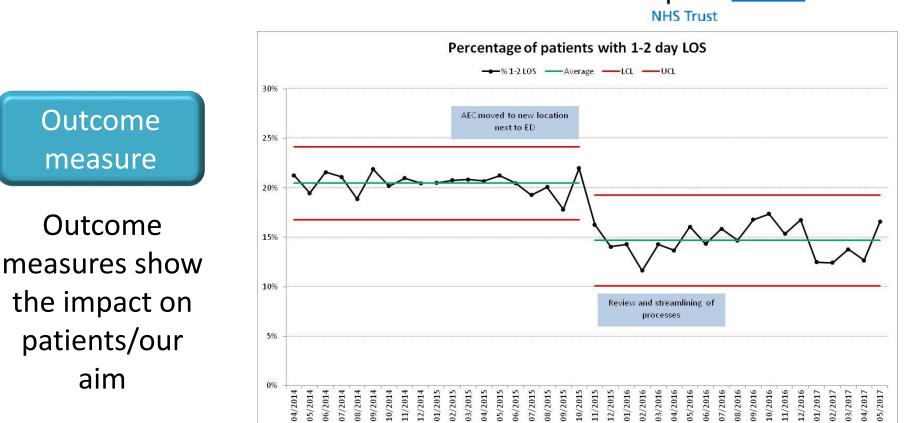

) •) • (2 •) =				SAEC SPC reporting tool V1 [Compatibility Mode] - Microsoft Excel				
	Home	e Insert	Page Layout	Formulas	Data R	iew View Developer	🛞 🗕 📼 🗙

An example from the AEC Network

The Princess Alexandra Hospital

An example from the AEC Network

The Princess Alexandra Hospital

Month and year

A driver diagram example

Aim	Driver	Changes planned		
	Ensure the right	Analyse activity daily		
01	patients are identified	Ensure staff are trained in AEC		
_	Reduce avoidable late presentations	Undertake board rounds in ED		
To prevent ambulatory		Advertise AEC stream		
patients being admitted		Advertise service operating times		
to hospital overnight	Avoid delays in			
	diagnostics / decisions	Create next day urgent slots		
02		Rapid access to diagnostics		
\cup	Smooth discharge	Immediate access to senior clinician		
		Easy access to take home meds		

O1 Overall admission

count

P1 time taken to get diagnosis / start treatment

B1 re-admission rate **B2** patient experience

O2 Non-elective medical P2 # board rounds in ED bed days used

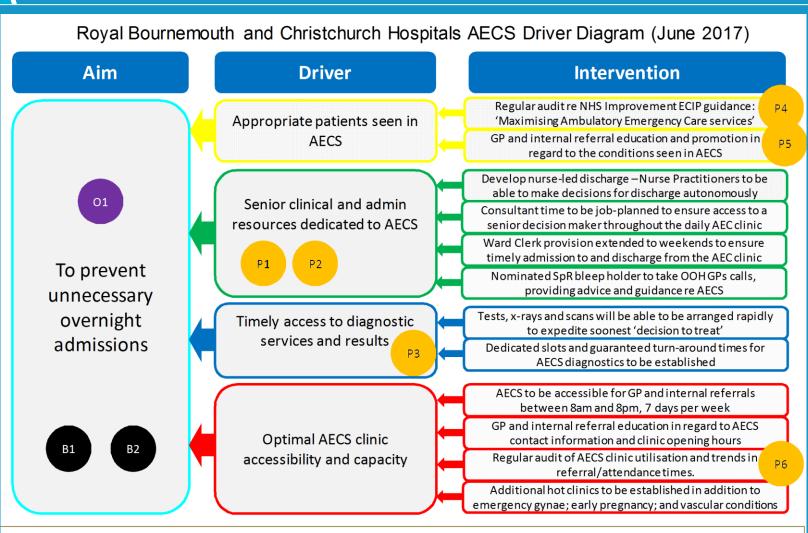

P3 time to access senior clinician

Ambulatory Emergency Care

Royal Bournemouth and Christchurch Hospitals

Ian Neville and Gail Dufeu

Outcome measure O1: higher proportion of 0-day length of stay for surgical take.Process measure P1: time taken to access senior clinician.Process measure P2: time taken for diagnosis /treatment.Process measure P3: time taken to request diagnostics/receive result.Process measure P4: compliance with ECIP guidance.Process measure P5: volumes of patients seen with specific conditionsProcess measure P6: % utilisation of AECS clinic slots.Balancing measure B1: re-admission rates.Balancing measure B2: patient feedback.

Time to reflect as a team

- Have we reviewed this as a team?
- Have we covered all the changes which we plan to make during the programme?
- Have we got a process measure for them all?
- Have we got a clear aim and outcome measures?
- Have we got a plan for completing and returning the SAEC Data Template?
- Will we be able to show the impact of our changes?

Before we go for lunch....

• We will just hear from a couple of teams

 Then make sure that you go and look at everyone else's driver diagram over lunch and ask them about the changes they plan to make
